

# The School Feast

To solve problems involving quantities and measures.

1

Red Class baked 18 buns and only 6 were eaten.

**How many buns were left?**

2

Blue Class mixed 18 litres of drinks. After the feast, there were 15 litres left.

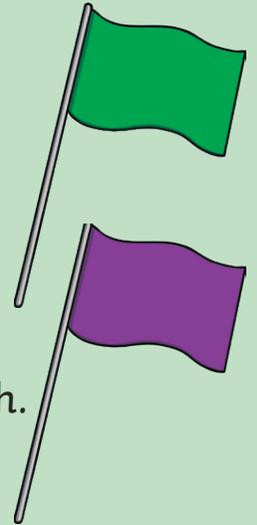

**How many litres were drunk at the feast?**

3

All the classes made flag poles to fly their flag on. Green Class' pole was 12 metres higher than Purple Class'. Purple Class' pole was 6 metres high.

**How high was Green Class' pole?**

4

The fastest runner in the school ran the cross country in 13 minutes. The next person took 18 minutes.

**How much faster was the winner?**

# The School Feast

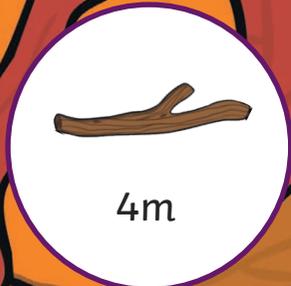

5

How many kilos do the ingredients weigh in total?

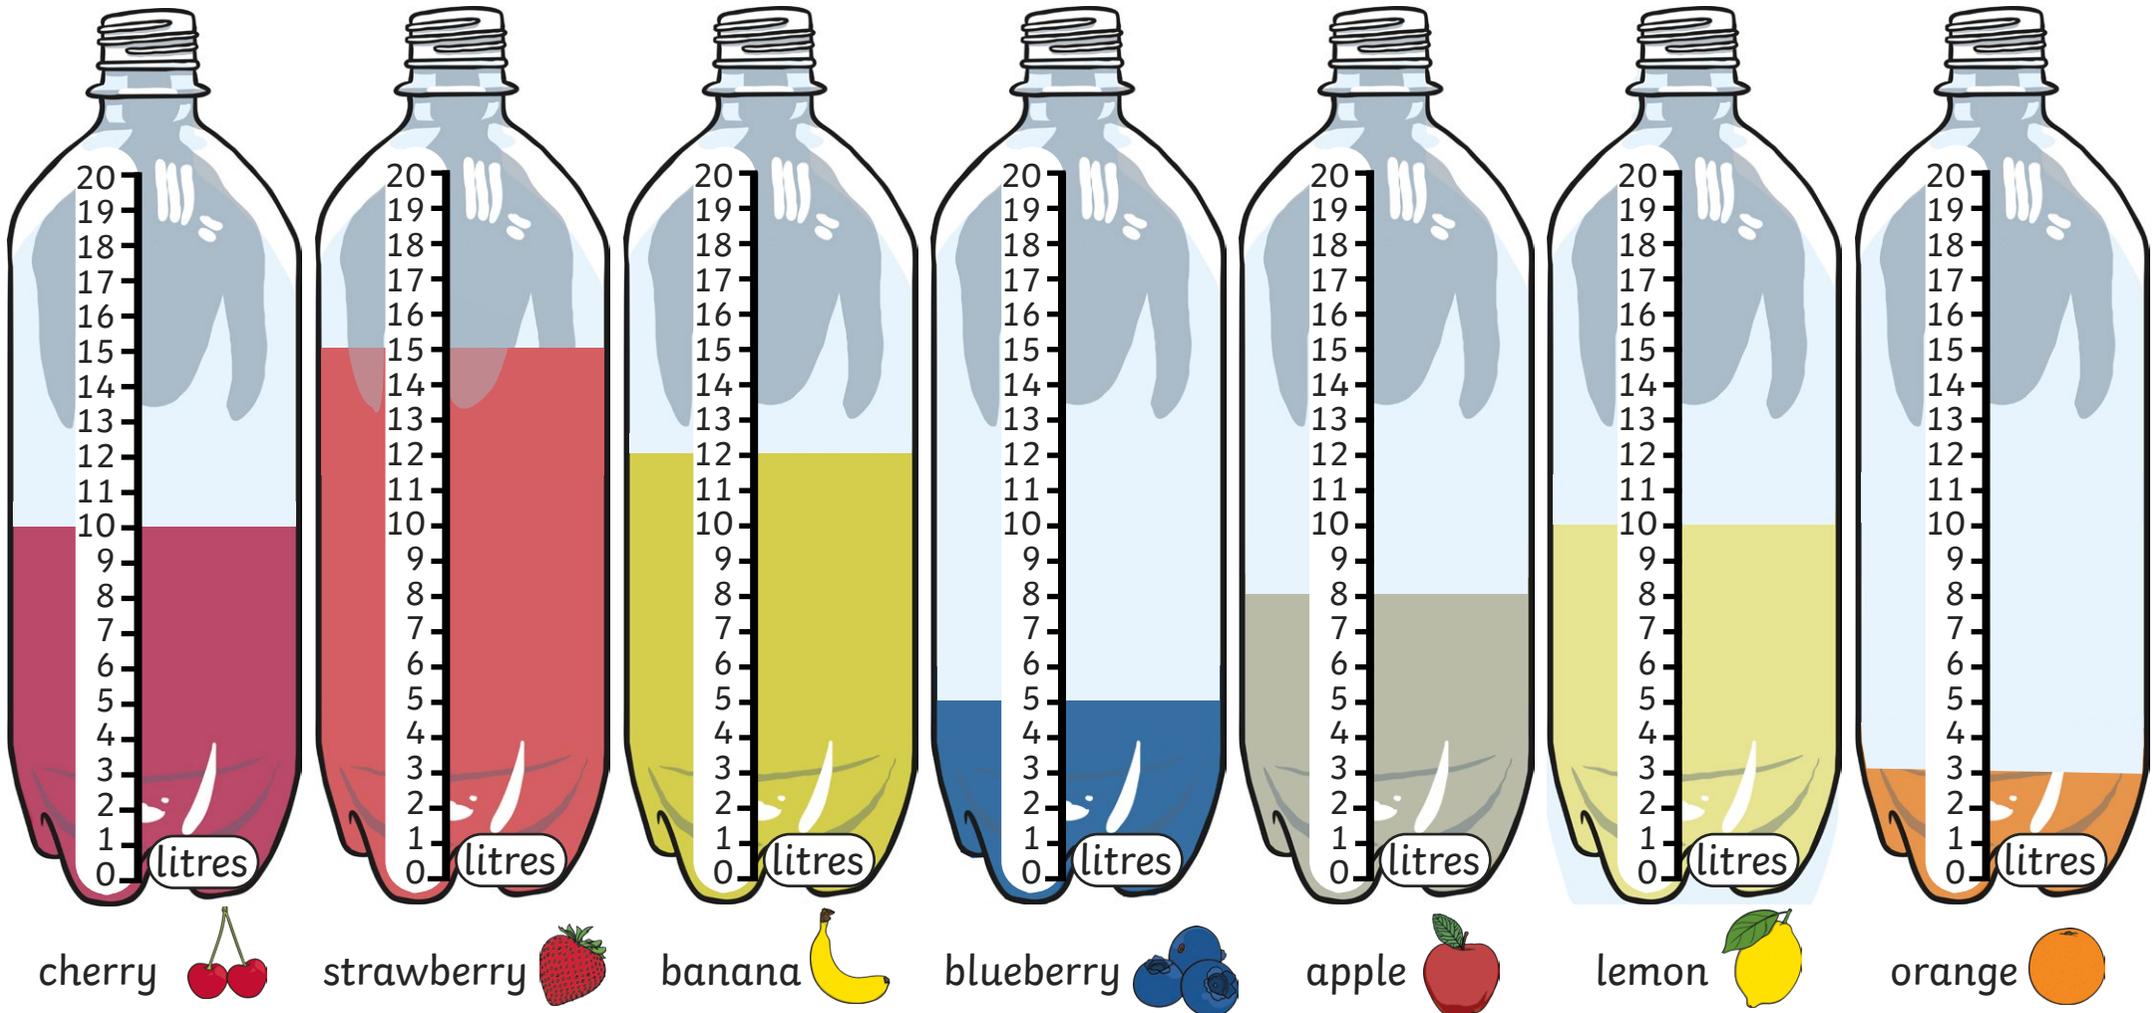

6

In the flagpole competition, the classes used 3 sticks.  
They had to make the combined height of the sticks as close to 12m as possible.  
**Which 3 sticks should they choose? Find 2 different solutions.**

# The School Feast

7 How many different drinks of 20 litres can you create?  
Can you make up names for your new flavours?

# Answers

1. 12 buns left
2. 3 litres
3. 18m
4. 5 minutes faster
5. 16kg
6. 6m, 4m, 2m  
5m, 4m, 3m
7. Possibilities include:  
Strawberry and blueberry  
15 litres + 5 litres  
  
Lemon and cherry  
10 litres + 10 litres  
  
Banana and apple  
12 litres + 8 litres

# The School Feast

To solve problems involving quantities and measures.

1

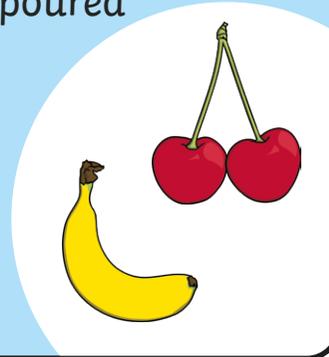

Red Class baked 16 buns. After the feast, there were 4 left.

**How many buns were eaten during the feast?**

2

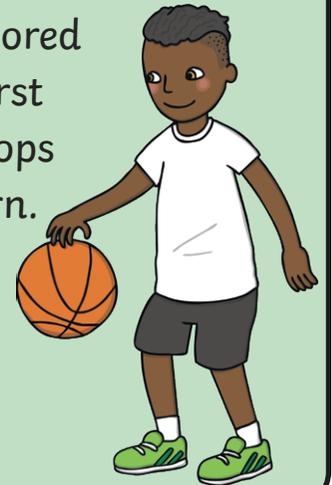

Blue Class used 8 litres of cherry, mixed with 5 litres of banana to make 'banerry' flavour. They poured it into a 20 litre bottle. **How much space is there left in the bottle?**

In the basket ball challenge, Ben scored 8 hoops on his first turn, then 13 hoops on his second turn.

**How many more hoops did he get with his second score?**

4

The fastest runner in the school ran the cross country in 14 minutes. The next person took 5 minutes longer.

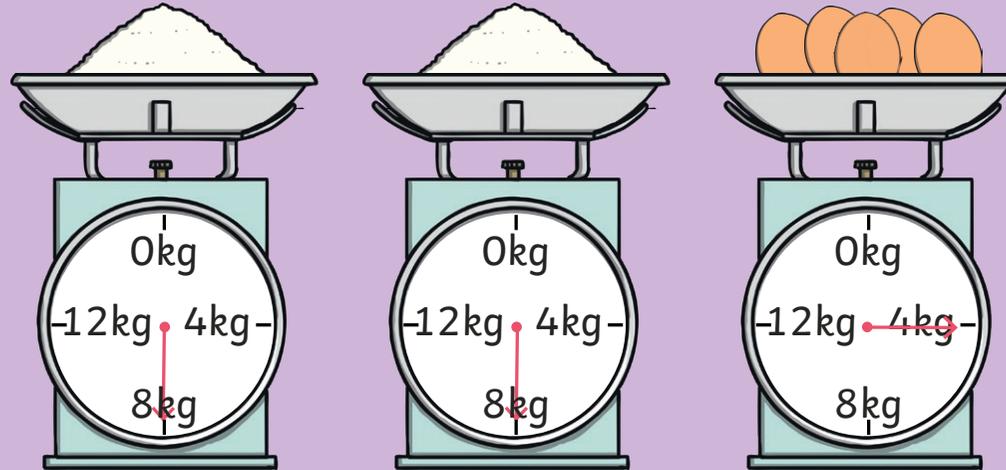

**How long did it take the second person to run the cross country?**

# The School Feast

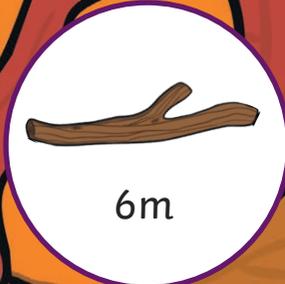

5

How many kilos do the ingredients weigh in total?

6

In the flagpole competition, the classes used 3 sticks.  
They had to make the combined height of the sticks as close to 16m as possible.  
**Which 3 sticks should they choose? Find 3 different solutions.**

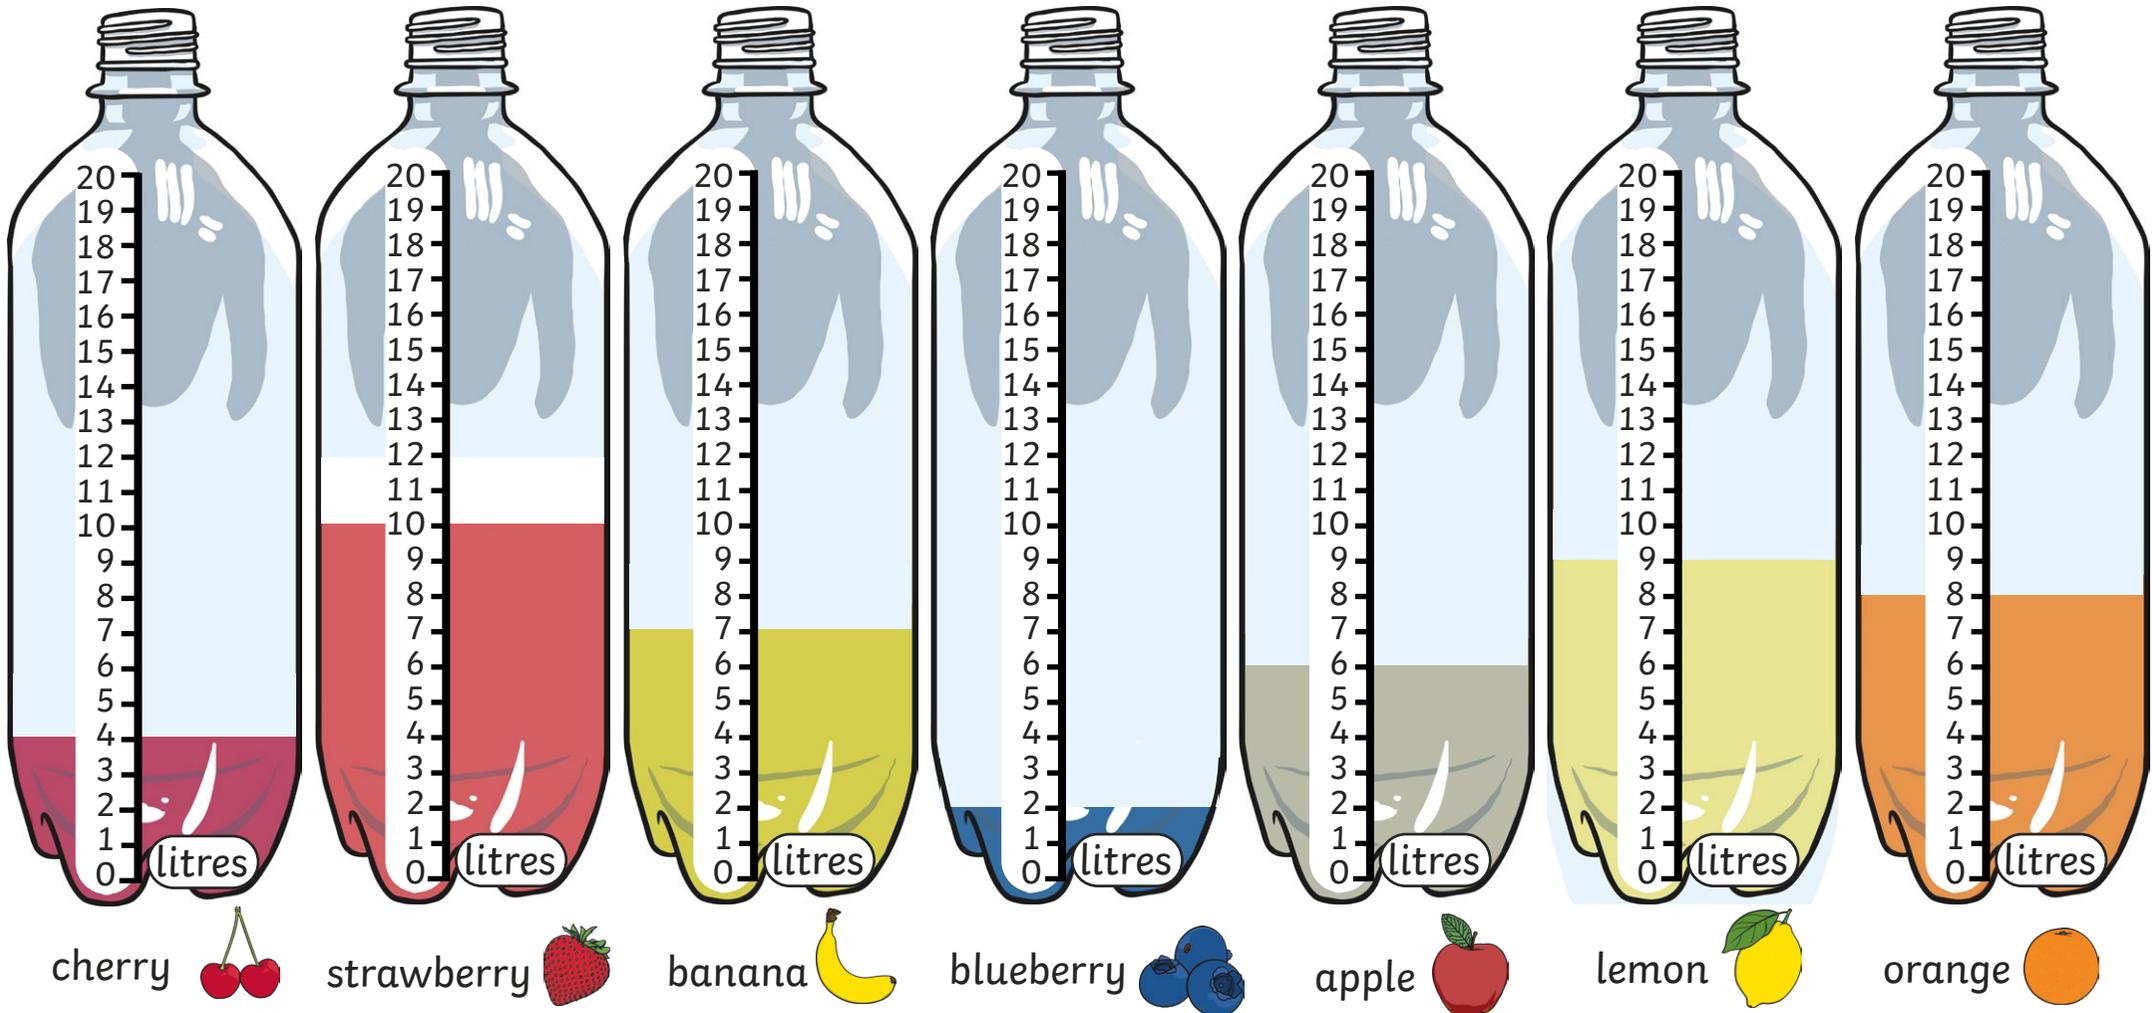

# The School Feast

7

How many different drinks of 20 litres can you create with 3 flavours?

Can you make up names for your new flavours?

# Answers

1. 12
2. 7 litres
3. 5 more hoops
4. 19 minutes
5. 20kg
6. Possibilities include:  
 $5m + 7m + 4m$   
 $7m + 3m + 6m$   
 $5m + 3m + 8m$
7. Possibilities include:  
 $10 \text{ litres} + 8 \text{ litres} + 2 \text{ litres}$   
 $9 \text{ litres} + 4 \text{ litres} + 7 \text{ litres}$   
 $10 \text{ litres} + 6 \text{ litres} + 4 \text{ litres}$

# The School Feast

To solve problems involving quantities and measures.

1

In Red Class, Anisa baked 7 buns and Erno baked 6 buns. After the feast, there were 2 buns left.

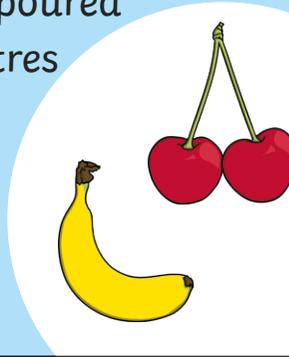

**How many buns were eaten during the feast?**

2

Blue Class used 8 litres of cherry, mixed with 7 litres of banana to make 'banerry' flavour. They poured it into a 20 litres bottle.

**How much space is there left in the bottle?**

3

In the basket ball challenge, Ben scored 12 hoops on his first turn. He scored 7 more hoops on his second turn.

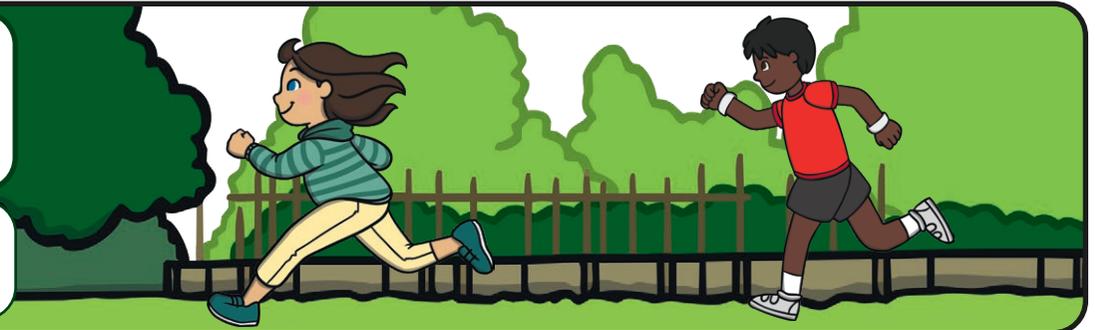

**What was his total score?**

4

Three members of Blue Class ran the 100m relay in 20 seconds. The 1<sup>st</sup> runner took 6 seconds and the 2<sup>nd</sup> runner took 7 seconds.

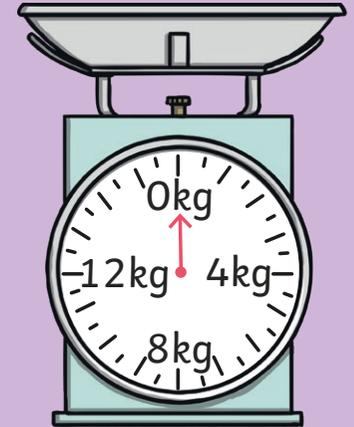

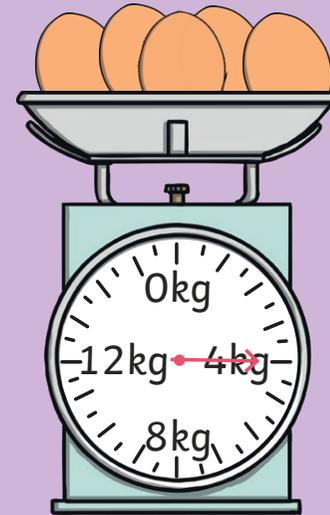

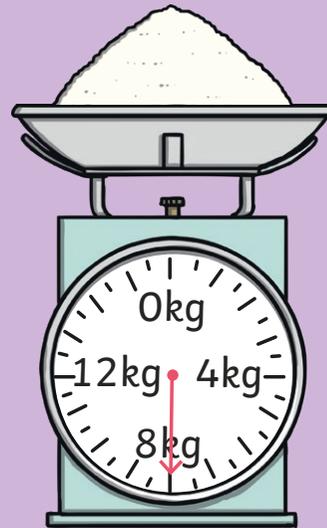

**How long did the 3<sup>rd</sup> runner take?**

# The School Feast

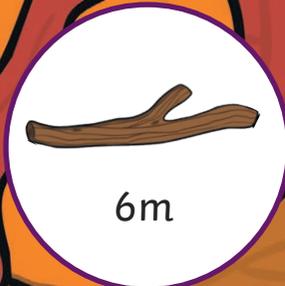

5

Ben needs 20kg of ingredients. **How much butter does he need to add?**

6

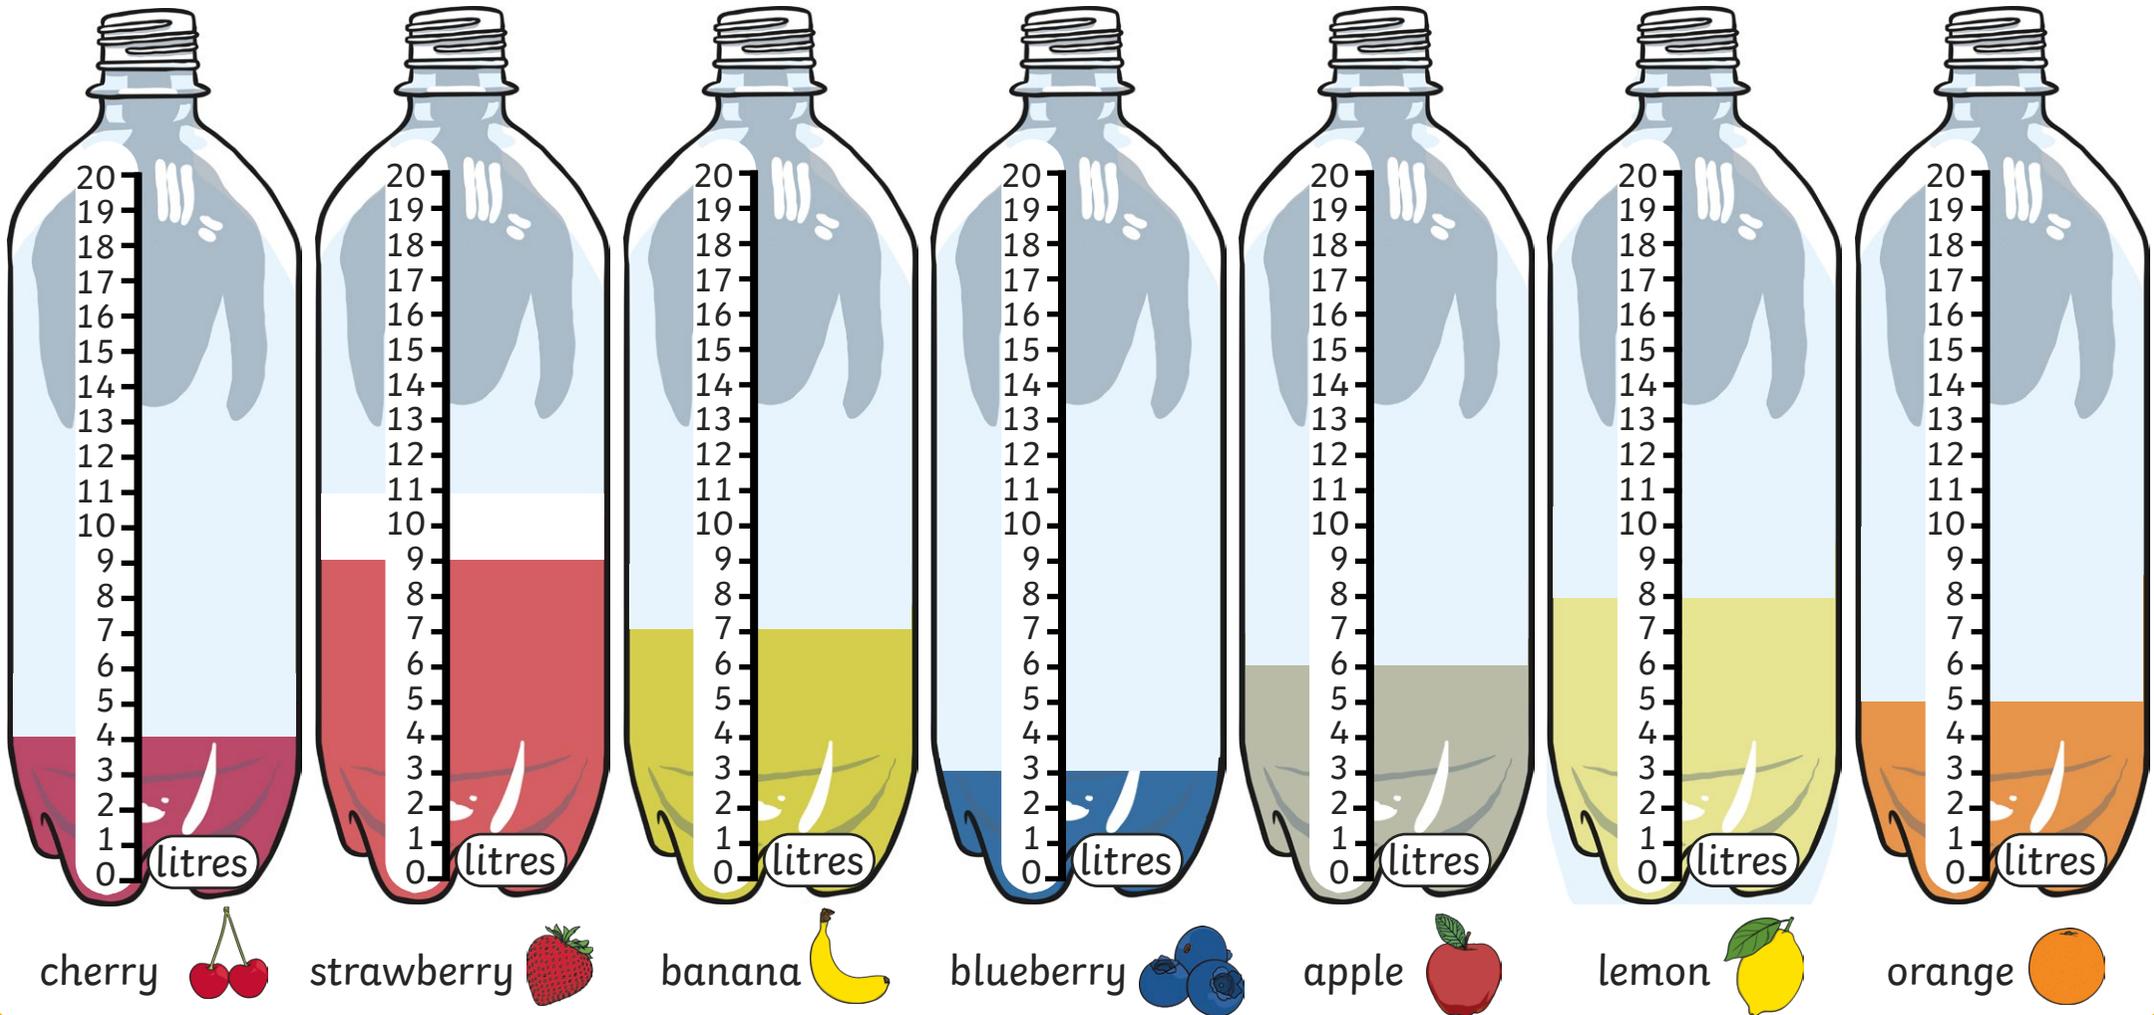

In the flagpole competition, the classes used 3 sticks. They had to make the combined height of the sticks as close to 20m as possible. **Which 3 sticks should they choose? Find 3 different solutions.**

# The School Feast

7 How many different drinks of 20 litres can you create?

Can you make up names for your new flavours?

# Answers

1. 11 buns eaten

2. 5 litres

3. 19 hoops

4. 7 seconds

5. 4kg

6. Possibilities include:

$9m + 5m + 6m$

$9m + 7m + 4m$

$8m + 7m + 5m$

Possibilities include:

Strawberry, apple and orange

9 litres + 6 litres + 5 litres

Lemon, banana and orange

8 litres + 7 litres + 5 litres

Apple, cherry, banana and blueberry

7. 6 litres + 4 litres + 7 litres + 3 litres
