

## How can I use this with my children?

Cut out the cards. You can use them as flashcards with younger children - show them a card and ask them to tell you what number it is. Can they create and recognise two-digit numbers?

## How does this help my children's learning?

These cards are a memorable visual aid when it comes to reinforcing the concept of number, helping your child to count as well as to recognise different numbers and what they represent.

## Ideas for further learning:

Pick a single digit and ask your child to tell you what is one more and one less than the number. Now create two-digit numbers and ask your child the same thing, what is one more and one less?
